

StarBoard™ T-15XL Interactive Display

The StarBoard™ T-15XL is the latest interactive system from Hitachi Software Engineering America for annotating presentations and running computer based applications in meetings, classrooms, videoconferences, trade shows and symposiums.

The StarBoard™ T-15XL is a pen-driven 15" TFT display that allows users to operate or annotate any software application running on a connected computer. The annotated images can be viewed on other displays such as an LCD projector or on any other StarBoard interactive display in the same location, or connected through a LAN or WAN connection for remote learning or conferencing.

Deliver Effective Interactive Lessons by Facing Your Audience

The StarBoard™ T-15XL offers an attractive presentation style and alternative for interactive whiteboards. Presenters face their audience when using the display device with the image projected onto any screen size depending on the layout of the meeting or classroom. The concerns of blocking the audience's view, losing eye contact, and staring into glaring projector light are resolved. The bright 15" display with XGA resolution, provides a clear image to operate with and pinpoint accuracy in running applications or delivering interactive presentations.

Lifetime StarBoard Support with a 2 year Manufacturer Warranty

Hitachi Software offers a full range of interactive communication systems for presentations, classrooms, and video conferences. Backed by a company known for quality products worldwide, you can trust StarBoard's reliable warranty and lifetime software support.

StarBoard Software Brings New Life to Presentations

The appeal of the StarBoard™ T-15XL is enhanced by the intuitive, easy-to-master StarBoard Software that allows anyone to be proficient in a matter of minutes. The pen-driven, icon oriented toolbar allows users to move from running applications to annotating over them with a single click. The main highlights of the software include the following:

- Revise, revisit, & reinforce - share, print, & save your work in a variety of universal file formats: PDF, JPEG, HTML
- Customizable toolbar - create multiple personalized toolbars
- Remote learning - conference up to 52 StarBoards
- Digital ink - 72 ink combinations: solids, highlighters, 3D, fancy, shadowed, and roller inks
- Comprehensive gallery - ready-to-go templates, graphs, maps, clip arts, math tools, science diagrams
- Handwriting recognition - convert freehand into ASCII text
- Three powerful pens - normal drawing pens, intelli-pen converts freehand into geometric shapes, laser pen for temporary annotations
- Object management - Manipulate, undo, redo, cut, copy, and paste
- List review - flip through multiple annotation sessions and programs with ease
- Video annotation - Import, capture, spotlight, zoom, and annotate
