

eBeam Projection + eBeam Whiteboard = eBeam Complete

eBeam Complete includes a single eBeam receiver, eBeam Projection's interactive stylus and eBeam Whiteboard's four color-coded marker sleeves and eraser.

This package allows you to choose whether you want to turn your existing whiteboard into either a fully-featured interactive whiteboard or an online-capable copyboard.

An Interactive Whiteboard without the board.

eBeam Projection can turn any projected image into a digital workspace whether it is shined on a whiteboard or a flat, blank wall. Use the interactive stylus like a mouse to control your computer from the front of the room. The flexible eBeam Interact software includes eBeam Scrapbook, a unique application that combines the most popular features from the most popular software titles.

A copyboard that does a lot more than just "copy."

eBeam Whiteboard with eBeam Capture software saves all of your dry-erase marker notes straight to your computer where they can be broadcast online in real-time to anyone with an Internet connection. Once captured to your computer, the notes can be edited, printed or e-mailed.

Attach eBeam to your classroom's existing whiteboard and start recording notes in minutes.

Allow students with learning disabilities to interact with classroom lessons from their desktop, laptop or Tablet PC.

Import existing documents into Scrapbook for editing, brainstorming and sharing. Replay annotations at any time.

Capture lengthy equations and replay them stroke by stroke - even ones that were erased!

Encourage student participation by using your educational software within the eBeam Projection workspace.

The pocket-sized eBeam receiver is small enough to take with you, share with colleagues or store in a desk drawer over the weekend.

eBeam Complete Components

- (1) USB or USB/Bluetooth System 3 receiver
- (4) eBeam marker sleeves
- (4) dry-erase markers
- (1) electronic eraser
- (1) interactive stylus

- Positional resolution: +/- 1.5mm

Warranty

- Two year limited warranty on hardware and software

Bluetooth Certification

- FCC: Part 15, Class B
- Bluetooth 1.1
- Frequency: 2.4GHz
- Serial Protocol

Bluetooth Radio Range

- Up to 33 ft (10 m)

Bluetooth is a radio technology developed to deliver short-range wireless mobility. Bluetooth technology eliminates cables, wires and cords between devices such as your computer and input systems like eBeam. Bluetooth enables communication between devices that are in close proximity (up to 33ft) to one another. Bluetooth facilitates fast, low-powered, secure transmission of data, even when the devices are not in line-of-sight.
