

Create An Interactive Whiteboard Wherever You Go

eBeam Projection paired with any standard digital projector gives students the power to interact with PowerPoint,[®] educational software, CD-ROMs and anything else on your computer right from the board. eBeam Interact software even includes a free sharing feature, so students with their own computers in or out of the classroom can join in the lesson. Turn off the projector and your whiteboard goes back to being just that – a whiteboard.

The compact eBeam receiver weighs less than eight ounces and can be attached to any existing whiteboard, wall or smooth, flat surface. Using either a wired USB or wireless Bluetooth connection, the receiver transforms the interactive stylus into a mouse that can control anything on your desktop including right-click menus.

Multi-button Interactive Stylus

Application-specific Tool Palettes

- Teflon Tip**
for long-lasting precision and accurate feel (functions as left-click)
- Right-Click**
works just like your mouse
- Menu**
for accessing the interactive palettes from anywhere on the projected display area

Annotation Palette
Shown when annotating over applications

Scrapbook Palette
Import, create, edit and save content in the most popular formats

Desktop Palette
The "hub" of the eBeam Interact software suite

PowerPoint Palette
Annotate and navigate your slide presentations in real-time

Creates an interactive workspace of up to 100" diagonal

Works with any digital projector

Annotates over any application

Share presentations over the Internet with anyone, anywhere, anytime

Fully integrated PowerPoint functionality

- Bluetooth 1.1
- Frequency: 2.4GHz
- Serial Protocol

Radio Range

- Up to 33 ft (10 m)

Warranty

- Two year limited warranty on hardware and software

Bluetooth is a radio technology developed to deliver short-range wireless mobility. Bluetooth technology eliminates cables, wires and cords between devices such as your computer and input systems like eBeam. Bluetooth enables communication between devices that are in close proximity (up to 33ft) to one another. Bluetooth facilitates fast, low-powered, secure transmission of data, even when the devices are not in line-of-sight.
