

Share and archive secure meetings with  
co-workers, clients or students!

- Enterprise Server - for up to 50 eBeam meetings and 500 users
- Personal Server - 1 eBeam meeting and 100 users
- Complete meeting archiving and reporting controls
- 128-bit encryption for high-end information security
- Highly recommended for corporate and educational institutions

Share your notes, presentations, documents, images, and drawings with anyone, anywhere in the world!

### eBeam Meeting Server

The eBeam Meeting Server Software is an optional software component for eBeam System users who need to share interactive whiteboard notes and drawings with large audiences. While each eBeam System comes with the ability of sharing notes with up to 10 users on the local network and up to 25 users on the Internet, the eBeam Meeting Server Software provides customers with an affordable large-scale and highly secure in-house web conferencing solution.

### Technical Support

Six month technical support (email) included.

### Warranty

Two year limited warranty on software.
